Hemant Metal Products

ABOUT COMPANY

Hemant Metal Products is family owned and operated company established in 1992. **Hemant Metal Products** is one of leading high quality manufacturers of Brass Precision components ,Brass Meter Parts, Brass Gas Parts, Brass auto parts, Industrial Brass Fasteners, Brass Sanitary Parts, Brass Screw, Brass nut bolt, Brass spacers, Brass anchor, Brass Electric Parts, Brass Hose Fitting etc. for the industries related to automobile sector, electronic and electrical sector, tele communication sector, instrumentation sector, plastic moulding sector etc. We are technology driven company and we have significant product portfolio including Brass CNC Components, S.S. CNC Components, Aluminium CNC Components like Brass Automotive Components, Brass Forged Components, Brass Machined Components and Brass Pressed Components. We are also manufacturing customize product as per customer requirements, designs and specifications.

Our organization is backed by a sound and sophisticated manufacturing unit that has equipped with latest manufacturing equipment and technology. Our products are manufactured and designed from high grade brass and globally accepted manufacturing techniques under the guidance of highly skilled and experienced professionals. Once manufacturing of our products completed, they are tested on various quality parameters under the guidance of highly skilled engineering staff and experienced quality analyst. Our products hold a very high standard for their excellent durability, reliability, performance and excellent finish. We consistently focus to develop our capabilities, manufacturing technologies, latest products and sales skills to enabling fast response to changing market conditions. We strive to understand and fulfil your current and future needs and to exceed your expectations. We achieve this through our efficient management, motivated employees who receive training on a regular basis and continuous improvement of our processes.

We are proud of our entrepreneurial spirit and steadfast growth over the years to attain a leading position in key international markets. Our mission is to provide cost-effective products that address our customer's specific objectives with the goal of building open and long-term relationships.

OUR MISSION

Our mission is to provide cost-effective products that address our customer's specific objectives with the goal of building open and long-term relationships.

Unlike some of our competitors we are not led by technology or processes. Customers and their needs and expectations lead us.

At Hemant Metal Products, we are committed to offer competitive advantage to our customers through quality & unmatched products.

WHAT MAKES US DIFFERENT

Hemant Metal Products has a well-staffed office where people are always available to take your calls.

We have some of the most experienced engineers so that your requirements are fulfilled with perfection.

Because of our Experience in this field, we can develop all the products as per your requirements.

RAW MATERIALS

We follow strict rules in procuring raw material to meet our customer's quality requirement. We source it from approved suppliers who match our quality standards.

We use following Brass grades to manufacture our products IS 319 grade 1 & 2, BS218, HTB grade 1 & 2, BS 1001 etc

It is not limited to what is listed above. We can manufacture from any customer specified copper alloy.

DESIGN & DEVELOPMENT

We have in-house design and development team, which can provide samples as per customer specification in no time. Once sample gets approved by customer we start our bulk production.

MACHINE UNITS

➔ **HAND DRILL**

➔ **WIRE DRAW**

➔ **LATHE**

➔ **AUTOMATIC DRILLING**

➔ **THREADING**

➔ **GRINDING**

➔ **SLOTING**

➔ **SHAPING**

➔ **HEADERS FOR SCREWS**

➔ **AUTOMATIC CUTTING & SLOTTING**

MACHINE UNITS

CNC MACHINE UNITS

We have in house
CNC units for machining
of all metal components.

FINAL INSPECTION

Material to be dispatched is thoroughly inspected as per quality requirements of our customers.

PACKAGING

All parts are **PACKED** in plastic bags then into small boxes.
Small boxes are placed in bigger cartons.
Cartons are further stacked in fumigated wooden pallets.
